

Softwhere?

Do you know where your Excel native redaction software is taking your projects? We do.

BLACKBAR EXCEL NATIVE REDACTION TOOL

REDACTING AND PRODUCING NATIVE FILES WITHIN EXCEL JUST GOT EASIER WITH BLACKBAR™

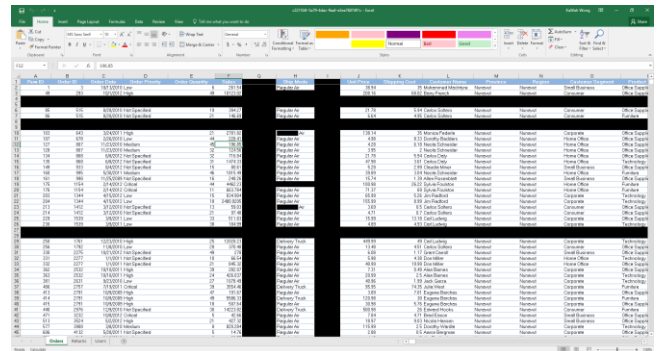

In the world of eDiscovery, everyone knows working with Microsoft Excel® files can be a bear. With that in mind, XDD has recently developed BlackBar™, a new, proprietary Excel Native Redaction Tool that empowers users to redact and produce Microsoft Excel files in native format to minimize time, cost and errors.

Fully integrated into our Relativity review platform, BlackBar is a fully defensible process that tracks all actions performed within the system. Its adaptable design fits into different workflows seamlessly, while providing full administrative and redaction functions within an easy to use interface.

- Natively redact XLS files within the tool
- Optimize traditional workflow productions
- Produce newly redacted XLS files in Native File Format
- Forever banish the need to TIFF XLS files
- Reduce time, cost and effort
