

XDD-SECURE

A secure, scalable technology platform that's SOC2 compliant

WORLD-CLASS SECURITY

SAFE, SECURE AND SCALEABLE MATTERS

XDD-Secure is the security layer of our XDD-360 technology platform. Built off our state of the art, SOC2 compliant IT infrastructure, XDD-Secure provides clients the peace of mind they need to focus on client matters instead of the technology that drives them.

AN INFRASTRUCTURE BUILT FOR SECURITY

In the ever-changing landscape of cyber and data security, our technology platform lives within an entirely secure IT infrastructure that's built for speed and adaptability.

- SOC2 compliant and independently audited
- Powered by our own, secure XDD datacenter
- Standardized protocol across XDD-360 tech
- Adaptable architecture to adjust to unknowns
- Optimized for reliability and control

XDD-SECURE PROVIDES

- Peace of Mind – assurance that your data is safe
- Reliability - accessibility when you need it
- Adaptability – flexibility to evolve with needs
- Control – access to monitor and control data
- Scalability – ability to expand as needs evolve

DATA ON LOCKDOWN

Our XDD-360 technology suite, services and Managed Review teams rely on XDD-Secure to run your matters while keeping your data secure all times.

- 100% of actions run from within secured XDD data center
- XDD network activity streamed through secured channel, encrypted, logged and verified
- On-site data-center personnel 24/7/365 with electronic and physical security measures including man-trap entry and biometric access
- All access filtered through robust Intrusion Detection system for any anomalies or threats

ENGAGE WITH XDD-360
